Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 16, drawn to a pay table, classified in class 273, subclass 309.
- II. Claims 1-15 and 17-20, drawn to a method of wagering, classified in class 273, subclass 236.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process can be practiced with another materially different product, such as an ordinary unmarked table, a floor surface or a desk.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Sam Rimell at telephone number (703) 306-5626.
